Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
JP 61057878	A		9		
JP 93003548	B		8	G01T-001/04	Based on patent JP 61057878

Abstract (Basic): JP 61057878 A

Rubber moulding dosimeter is prepd. by combining alanine crystal powder 10-500 pts. wt. with 100 pts. wt. synthetic rubber or natural rubber and moulding it.

ADVANTAGE - Dose of ionising radiation such as gamma-ray, X-ray, electron ray, neutrons, etc. can be simply and accurately detd. since the radical concn. of alanine crystal alone is detd. The determ. range of dosage is 10-100 KGy. The upper usable temp. limit of the dosimeter is about 150 deg. C. Determns. of high reproducibility can be carried out in high humidity. The dosimeter can be made by press-moulding, extrusion, etc. Distribution of dose in materials of complicated shape can be detd. using belt-form, sheet-form or linear rubber moulding.

Journal: Section: P, Section No. 483, Vol. 10, No. 223, Pg. 4, August 05, 1986 (19860805)

ABSTRACT

PURPOSE: To obtain the dosimeter which measures dosage with high precision over a wide range by mixing and molding alanine crystal powder with synthetic or natural rubber and utilizing the stableness of an alanine radical produced by radiation irradiation.

CONSTITUTION: 10-500pts.wt. alanine crystal powder is mixed uniformly with 100pts.wt. synthetic or natural rubber and a cross-linking treatment is carried out so as to improve heat resistance when necessary, and the mixture is used for a dosimeter element. Alanine crystal has a 293 deg.C fusion point and is kneaded with the rubber at 100-140 deg.C below the fusion point. The kneaded mixture is formed into a disk or a film for the dosimeter element.

into small pieces and heated at 100-140 deg.C for 1-2 hours to form a dosimeter

Consequently, there is almost no radical generation due to radiation irradiation and a radical generated in the alanine crystal is stable and the rubber cuts off the moisture in air, so there is no influence of environment exerted and a measurement of dosage is taken with good reproducibility and precision over a wide range of 10Gy-100KGy.
